

## **Synonym**

IL2RB,RP5-1170K4.6,CD122,P70-75

### **Source**

Cynomolgus IL-2 R beta Protein, Fc Tag(ILA-C5253) is expressed from human 293 cells (HEK293). It contains AA Ala 27 - Thr 240 (Accession # Q38J85-1). Predicted N-terminus: Ala 27

## **Molecular Characterization**

IL-2 R beta(Ala 27 - Thr 240) Fc(Pro 100 - Lys 330)
Q38J85-1 P01857

This protein carries a human IgG1 Fc tag at the C-terminus.

The protein has a calculated MW of 51.2 kDa. The protein migrates as 55-65 kDa when calibrated against <u>Star Ribbon Pre-stained Protein Marker</u> under reducing (R) condition (SDS-PAGE) due to glycosylation.

### **Endotoxin**

Less than 1.0 EU per µg by the LAL method.

# **Purity**

>90% as determined by SDS-PAGE.

#### **Formulation**

Lyophilized from 0.22  $\mu m$  filtered solution in PBS, pH7.4 with trehalose as protectant.

Contact us for customized product form or formulation.

#### Reconstitution

Please see Certificate of Analysis for specific instructions.

For best performance, we strongly recommend you to follow the reconstitution protocol provided in the CoA.

### Storage

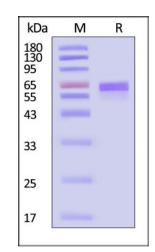

For long term storage, the product should be stored at lyophilized state at -20°C or lower.

Please avoid repeated freeze-thaw cycles.

This product is stable after storage at:

- -20°C to -70°C for 12 months in lyophilized state;
- -70°C for 3 months under sterile conditions after reconstitution.

# **SDS-PAGE**

Cynomolgus IL-2 R beta Protein, Fc Tag on SDS-PAGE under reducing (R) condition. The gel was stained with Coomassie Blue. The purity of the protein is greater than 90% (With <u>Star Ribbon Pre-stained Protein Marker</u>).

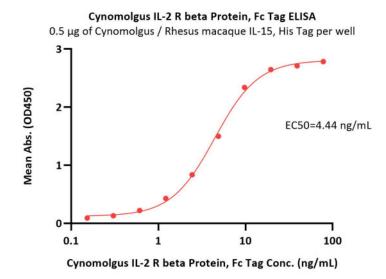

# **Bioactivity-ELISA**

# Cynomolgus IL-2 R beta Protein, Fc Tag

Catalog # ILA-C5253

Immobilized Cynomolgus / Rhesus macaque IL-15, His Tag (Cat. No. IL5-C52H4) at 5  $\mu$ g/mL (100  $\mu$ L/well) can bind Cynomolgus IL-2 R beta Protein, Fc Tag (Cat. No. ILA-C5253) with a linear range of 0.2-10 ng/mL (QC tested).

### Background

Interleukin-2 receptor (IL-2R) is a heterotrimeric protein expressed on the surface of certain immune cells, such as lymphocytes, that binds and responds to a cytokine called IL-2. The IL-2R is made up of 3 subunits -  $\alpha$  (CD25),  $\beta$  (CD122) and  $\gamma$  (CD132) - non-covalently associating. The  $\alpha$  and  $\beta$  chains are involved in binding IL-2, while signal transduction following cytokine interaction is carried out by the  $\gamma$ -chain, along with the  $\beta$  subunit.

CD122 is also known as IL2R beta, is a member of the type I cytokine receptor family. CD122 is the receptor for interleukin-2 and is involved in receptor mediated endocytosis and transduces the mitogenic signals of IL2.
